Art Unit: 3637

1. Applicant's election with traverse of claims 1-12 in Paper No. 4 is acknowledged. The traversal is on the ground(s) that the process and the portable facility being similar to ample justifications for keeping them in the same application. This is not found persuasive because despite the fact that the process and the portable facility are drawn to related inventions, the process claims contains claimed steps which are not required in the "facility" claims, and the steps require additional search; for example, claim 16 " the step of removing grease occurs...outside of the enclosure" is not in the article claims.

The requirement is still deemed proper and is therefore made FINAL.

#### ***Claim Objections***

1. Claims 1-7 are objected to because of the following informalities:

Claim 1 has " ; " between phrases. Should it be " , " between the phrases?

Line 4 " with the enclosure " is confusing. Should it be " within the enclosure"?

Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Montgerard (4643476).

Art Unit: 3637

Montgerard (figures 1-2) shows a portable facility having an enclosure, the enclosure having many equipment, the enclosure having at least one end through which access to the interior of the enclosure is obtained, a deck at said one end of the enclosure (the floor acting as a deck), the enclosure having stations to locate different equipment at the sidewalls, a center aisle separates the stations along each side wall, the enclosure having side walls, ends through which access to the interior of the enclosure is obtained, a roof which extends between the side walls and over the interior of the enclosure, doors attached to the side walls.

As Montgerard shows equipment and the enclosure as claimed, the equipment in Montgerard inherently can function as claimed.

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art shows different portable facility designs.
